

Title of Your Article Needs to Be Placed Here

Author 1¹ Author 2^{**} (Please do not write any information here before submitting your manuscript.)

Abstract

The abstract needs to be in Times New Roman, 9pt, justified on both sides, and between 150-200 words. The abstract should reflect on the content, method, results, highlights and the originality of your article in a brief and explicit manner. You can place your abstract after removing this text without changing the format.

Key Words: Keywords, Keywords, Keywords (min 3)

Introduction

The main headings should be in Times New Roman, 11pt. The text should be in Times New Roman, 10pt, single line spacing and justified on both sides. The main topic of the research, brief information about the sections of the study, its place in the literature, the significance of the study, research problem(s) and purpose(s) should be included in this part. If needed, subheadings can be used in this section.

Methodology

The type of the study, target group, data collection tools, validity and reliability, data collection methods, data analysis, limitations should be included in this section. If needed, subheadings can be used in this section.

Research Design

The research method and the reasoning behind it should be included in this section. The literature about the research method should be stated. Moreover, the design of the study should be stated.

Population and Sample/Study Group/Participants

In accordance with the content of the study, please choose one of the above (Population and Sample / Study Group / Participants). Quantitative research should include explicit information about the population and sampling methods. In qualitative research, study groups should be used included rather than sampling since the study group method is conducted by the participation of multiple individuals or units. The individuals or the units constituting the target group should be introduced. The information related to the context of the target group should be stated here.

Data Collection Tools

The data collection tools used in the study should be indicated here. Every tool should be introduced with an explanation of the reason behind the choice, its reliability and validity, and features. If needed, data collection

¹ The Title of the Author (Prof. Dr., Assoc. Prof. Dr., Asst. Prof. Dr., Lecturer Dr. Lecturer etc.), Adress, City/Country. ORCID Number, E-Mail: mail@mail.com (Please do not write any information here before submitting your manuscript.)

^{**} The Title of the Author (Prof. Dr., Assoc. Prof. Dr., Asst. Prof. Dr., Lecturer Dr. Lecturer etc.), Adress, City/Country. ORCID Number, E-Mail: mail@mail.com (Please do not write any information here before submitting your manuscript.)

tools can be introduced under subheadings. Subheadings should be written in sentences, italicised, starting with paragraph and the name of the measurement tool should be given in full. As an example;

Critical thinking tendency scale. Should be written in Times New Roman, 10pt., one line spacing and justified to both sides.

Data Collection

This section should state how, when and under which circumstances the data collection tools are used. If the study is experimental, the experiment or the control conducted should be detailed. Not only the procedures included in experimental group(s) but also the control group(s) should be stated.

Data Analysis

Quantitative research should include methods used in analysis procedure(s) and their suitability for the research questions and hypotheses. The data analysis procedures should be discussed extensively. Quantitative research should include methods used in analysis procedure(s) and their suitability for the research questions and hypotheses. The data analysis procedures should be discussed extensively.

Research Ethics

Authors should give information about ethical process of the research. This section should contain an ethical statement and ethical committee approval information (committee name, date and number).

Findings

The findings obtained from the data analysis should be given in line with the purpose of the study. Tables and figures can be used to indicate the analysis result. The findings section should only be concerned with the presentation of the results, and should not include result discussion. Subheadings can be used in line with the aim of the study. The subheadings should be in bold and italics, indented with the paragraph and first letter in upper case. As an example;

Findings Regarding the Critical Thinking Tendency (This title is an example)

The text regarding the findings should be in Times New Roman, 10pt, single line spacing and justified on both sides.

Discussion and Conclusion

This section should include the discussion of the findings. The findings should be discussed in the order of the given research question(s) or hypotheses. The discussion should be written while taking into consideration the similarities and differences present in the literature and the reasons behind these similarities and differences should be emphasized. This section can be separated to “Discussion”, and “Conclusion” while it can also be kept as “Discussion and Conclusion”.

Acknowledgments

If the article is submitted as a proceeding, on the condition of not being partially or fully published, a project or dissertation, it should be stated in this section. If the article is supported by a research institution or a fund, the name of the foundation, project number and completion date should be stated here. If desired, appreciations to a person or a foundation within the context of the article should be stated here.

Statement of Publication Ethics

Authors should declare that the research has no unethical problem and they observe research and publication ethics.

Researchers' Contribution Rate

Authors should determine their rate of contribution to every phase of the study.

Conflict of Interest

Authors should express whether the study has any conflict of interest or not.

Presenting Tables and Figures

Table title should be written in bold, justified on both sides, and the initials of the table title (except for conjunctions and prepositions such as; and, the, of etc.) should be in uppercase. There should not be lines between the items. Table number, table title, table and table space should be 0pt. There should be a 12pt of spacing between the last line of the table and the next paragraph. The sample table is given below.

Table 1. Distribution in Terms of Socio-Economic Classes

Socio-Economic Levels	N		SS
Low Socio-Economic Level	307	67.87	9.20
Medium Socio-Economic Level	230	66.27	8.84
High Socio-Economic Level	218	67.17	10.46

Figure numbers and titles should be justified on both sides below the figure. Only the initial should be in uppercase, except for proper nouns. Should not be in bold. The part before the figure title should be written in bold (Figure 1. Figure 2.). There should be a 12pt of spacing between the figure title and the figure and the next paragraph.

Figure 1. Distribution in Terms of Socio-Economic Level

References

The references section should be prepared by taking into consideration APA (6th Edition) referencing style. Please see the Writing Manual for further information.

The font should be Times New Roman, and the line spacing should be 6pt. The indentation should be made so that it will be under the fourth word.
